

PROGRAMME FOR 2019

WORK DAYS

January 19TH TREE CARE. No tree whips this month, so we will concentrate on caring for those planted over the last three years.

March 2ND PLANTING SPECIMEN TREES. A different emphasis this year, rather than lots of whips, one or two specimen trees will be planted.

April 6th SPRING BONFIRE. The first of our two annual bonfires to help keep the Beeches tidy, always a very satisfying time.

May 11th CARING FOR OUR YOUNG TREES. Returning to old sites to ensure that our young trees have room to spread their branches.

June 8th PATH CLEARING. Usually by this time of the year, nettles and brambles will need to be cut back to keep the paths clear

July 13TH BARBEQUE. Everybody said what a grand time they had last year. A little work at first to be followed by our annual BBQ.

September 14th MORE SPRING BULBS. Can we ever plant too many spring bulbs, probably not, the flowers bring so much joy in the spring.

October 19th AUTUMN CLEAR UP. Summer growth will be dying back, a final opportunity to clear paths and care for our new trees, but as always there will be time for warming evenings.

November 16th WINTER BONFIRE. The second of our annual bonfires, a really fun time and a fitting conclusion to our year's work in the Beeches.

ANNUAL GENERAL MEETING

November 29th AGM St. Marys church hall. An opportunity to meet and discuss the future activity of FOPB.
